PART NUMBER 0862

Why use a Relay?

Why use a Relay?
A relay will handle the additional Amp draw that some halogen lights require. This will increase the life of the headlight switch and the overall durability of the wiring system. Let the relay do the work.

Use "y" Connections For Additional Marker Lights. (Supplied In This Wiring Kit).

PART NUMBER 0862

NOTE: HEAD LIGHT SWITCH CONTROLS THE GROUND SIDE OF THE RELAY FOR ON & OFF OPERATION OF LIGHT SYSTEM.

Accessory Power Supply Leads.
RED = 12 V
White/Black = Ground

Replacement: PART NO. 12V-0942, 24V-0941
